

Médecin Anatomo-Pathologiste

Poste à pourvoir: 1

Position: Pathologiste, Director, Medical Affairs

Site: LabCorp Central Laboratory Services - Genève - Suisse

Contact : catherine.bor-angelier@labcorp.com and alisa.sargent@labcorp.com

Tel: +41 (0)58 822 60 36

Geneva (Switzerland). Labcorp is a global contract research organization employing over 50,000 people throughout 60 countries. Our Central Laboratory Services division conducts clinical trials on behalf of pharmaceutical and medical device companies, offering the world's largest central laboratory network. This opening offers a pathologist the opportunity to build global experience and pursue a promising career path at the cutting edge of drug development.

Working on the Medical Affairs team involves frequent collaboration with a group of pathologists and colleagues at our locations in the US, EU and Asia/Pacific. Duties include review tested slides and providing scoring reports, supporting anatomic pathology, providing leadership in areas of expertise, and offering consultative medical guidance to our internal colleagues, sponsors and investigators. Training in anatomic pathology is required; molecular pathology training is beneficial but not required. Language proficiency in French and English is required.

Primary Responsibilities:

- Oversee medical decision-making and fulfill laboratory and regulatory functions.
- Collaborate in global trials involving whole slide imaging and artificial intelligence platforms.
- Participate in the review and approval of new test offerings and service feasibilities.
- Collaborate closely with the on-site laboratory on testing in anatomic pathology and other areas.
- Provide leadership in areas of subspecialty expertise, if applicable.
- Review digital images and microscopic slides (mainly IHC & ISH, H&E, scoring lesion)
- Participate in investigator meetings or client visits to provide medical support for trials.
- Analyze and respond to clients' pathology-related inquiries.
- Contribute to implement quality standards and help assure regulatory and legal compliance.
- Collaborate in development/validation of methods and selection of appropriate tests.

Education and Qualifications:

- Board certification / eligibility in anatomic pathology.
- Other board certification / eligibility is a plus.
- French and English language proficiency.
- Ability to adapt and easily interact within a team and with clients at meetings.
- Strong written and verbal communication skills.
